OSHE: Hosts Editor Crack + Product Key Download [32|64bit]

OSHE: Hosts Editor For Windows 10 Crack enables you to quickly access the Windows Hosts file, view the current TCP/IP configuration, and make any modifications regarding IP addresses, host names, and comments.

It lets you add new records and revert settings to default. Q: C# Deserializing JSON containing objects with a datetime property, throws an InvalidCastException I am trying to deserialize some JSON from the EDN file format, as explained in this answer. However, I do not know how to force my json deserializer to accept a string value for the Datetime property of an object, when this is a value inside the json string. This is the json string, as a string {"AssetId":1, "Status":"UNKNOWN", "ErrorDetail":"Asset owner has not responded to request", "LastRequestDate":"2017-06-11T09:08:30.6974999+00:00", "DateRequested":"2017-06-13T00:00:00", "LastResponseDate":"2017-06-11T09:08:29.408799+00:00", "ResponseStatus":"Success", "LastResponseDate":"2017-06-11T09:08:29.5557001+00:00", "ResponseType":"ASSET_RESPONSE", "ResponseMessage":"Asset has been responded to", "DateLastResponse":"2017-06-11T09:08:29.5557001+00:00", "DateLastResponseReceived":null, "RequestDate":"2017-06-13T00:00:00", "DateAdded":"2017-06-13T00:00:00"} This is how the json deserializer is configured public class RequestData { public string Status { get; set; } public string ErrorDetail { get; set; } public string LastRequestDate { get; set; } public string DateRequested { get; set; } public string LastResponseDate { get; set; } public string ResponseStatus { get; set; } public string ResponseType { get; set; } public string ResponseMessage { get; set; }

OSHE: Hosts Editor Crack + Activation Key
