June 27, 2017â€” Pangolin as a member of the ILDA committee had an excellent influence on the design of this standard laser protocol, resulting in today. The original prototype was presented at the National Meeting on Laser Spectroscopic Monitoring in 2015. It was a modified prototype that also included a high resolution camera as well as a new touch control that could detect fine details in images. The prototype was later shown at the Infrared Spectroscopic Monitoring Conference held in 2016 at the National Science Museum of Canada. The prototype has two sensors:
